Selecting the correct ear tip

Age	Ear tips inserted against ear canal	Ear tips inserted against entrance of ear canal			Ear tips for Echo-Screen®	Ear tips for AccuScreen®	
0.5 y/o		 Green pediatric			 4.0 mm, ANA	 3.7 mm, AOT	
		 3-5 mm, flanged	 3-6 mm, green	 6 mm, green	 4.5 mm, ANA	 4.0 mm, AOT	
	 7.5 mm, umbrella	 4-7 mm, flanged	 6 mm, yellow		 5.0 mm, ANA	 4.5 mm, AOT	
	 9 mm, umbrella	 5-8 mm, flanged			 infant tree, ANA	 5.0 mm, AOT	
	 10 mm, umbrella	 7 mm, mushroom	 7 mm, red	 7 mm, yellow	 mushroom, ANA	 4-7 mm, AOT	
	 11 mm, umbrella	 8 mm, mushroom	 8 mm, blue	 8 mm, red			
	 13 mm, umbrella	 9 mm, mushroom	 9 mm, green	 9 mm, blue			
	10 y/o		 10 mm, mushroom	 10 mm, yellow	 10 mm, green		
		 15 mm, umbrella	 11 mm, mushroom	 11 mm, red	 11 mm, yellow		
	Adults		 12 mm, mushroom	 12 mm, blue	 12 mm, red		
 19 mm, umbrella		 13 mm, mushroom	 13 mm, green	 13 mm, blue			
		 14 mm, mushroom	 14 mm, yellow	 14 mm, green			
		 15 mm, mushroom	 16 mm, red	 16 mm, yellow			
 22 mm, umbrella		 19 mm, mushroom	 18.5 mm, blue				

Selecting the correct size of ear tip takes practice

In general, flanged or mushroom-shaped ear tips will be used for most testing (Impedance, DPOAE, TEOAE and Automated ABR).

Sometimes, an umbrella-shaped ear tip will be used for performing a quick impedance screening.

The table can be used as a guide to help you select the appropriate ear tip size.

Disposable Sanibel™ ADI ear tips

For use with the following acoustic immittance instruments and otoacoustic emission systems with CLEAR probe tip: Amplivox: all OtoWave versions. Interacoustics: Titan, AT235, AA220, Eclipse, MT10, Sera. Maico: EasyTymp, MI 22, MI 23, MI 24, MI 26, MI 34, MI 44, Easyscreen

Sanibel™ Probe Tube Removal Tool

- A = Probe
- B = Probe Tube Installer
- C = Attachment to probe cable
- D = Tube Remover

To Remove a Probe Tube

1. Place the front hole of the Probe Tube Tool over the end of the probe, as shown. The probe should be seated against the face of the tool and snap in place.
2. Squeeze the tool closed and hold it.
3. Twist the tool a couple of times while holding the tool closed and pulling away from the probe.
4. The probe tube will pull out from the probe. Discard the probe tube.

To Install a New Probe Tube

5. Place a new tube into the hole on the top of the tool.
6. Align the probe with the tube.
7. Push the probe onto the probe tube until the probe contacts the face of the probe tube tool and a snapping sound is heard.
8. Slide the tool off leaving the tube in place in the probe.

VOLUME DISCOUNT AVAILABLE for minimum orders of 6 bags

NEW

The "REM effect"
– better fitting & fewer follow-ups!

Use Sanibel™ probe tubes for any equipment

We often hear from the industry that only the manufacturers' specific probe tubes should be used with their specific equipment. However, a recent comparative study by Sanibel Supply® disproves this myth.

In this study, our in-house audiologists and engineers compared the effects of different probe tubes on an Affinity^{2.0} system. They compared AudioScan tubes (red), Otometrics tubes (blue), Sanibel™ tubes (orange) and Sanibel™ tubes (grey).

This involved running each tube via the 'tube calibration' process and then comparing the following REUG curve when the tube had been left in the calibration position.

The investigation showed no significant difference in the REUG curve and all probe tubes achieved the same result when the calibration process had been run correctly.

HIF

Silicone tubes for SPL60™

For use with Affinity™ REM probe.

Part no.	Unit
8500700	Bag/50 pcs

HIF

Sanibel™ REM probe tubes, type A

Universal fit, length 76 mm, beveled 45° angle tip and black marker ring.

Part no.	Unit
8104116	Tray/50 pcs

HIF

Sanibel™ REM probe tubes, type B

Cost efficient, length 80 mm and marker ring.

Part no.	Unit
8500360	Bag/40 pcs

HIF

Audioscann probe tubes

Compatible with Audioscan, Axiom and Verifit equipment

Part no.	Unit
RE407-40	Tray0 pcs

HIF

Pre-bent tubing

Part no.	Description	Unit
8515641	Standard #13	Bag/25 pcs
8515642	Standard #12	Bag/25 pcs
8515643	Thick #13	Bag/25 pcs
8515644	Extra Thick #13	Bag/25 pcs

HIF

Pre-bent tubing

Tinted

Part no.	Description	Unit
8515652	Standard #13	Bag/10 pcs
8515653	Medium #13	Bag/25 pcs
8515644	Thick #13	Bag/25 pcs

2

HIF

Tube lock with tubing

Brass metal lock

Part no.	Description	Unit
8515658	Thick	Bag/10 pcs
8515659	Super Thick	Bag/10 pcs

HIF

2

Tube Lock without tubing

Brass Tube-Locks Tube-Locks are used for attaching tubing to flexible type earmolds without requiring any cement, yet allowing tubing replacement as needed.

Part no.	Description	Unit
8515664	#13 Thick	1 pc
8515665	#13 Super Thick	1 pc

Surgical Blades and Handles

Suitable for cutting HA tubing.

Part no.	Description	Unit
8515427	Surgical blade handle No.3	1 pc
8515428	Surgical blades No11	100 pcs

New

Tube lock applicator

A handy tool when inserting Tube-Lock into mold.

Part no.	Unit
9002907	1 pc

New

Tubing Puller

For replacing worn out tubing, Pulls tubes easily through any type of mold or canal tip

Part no.	Unit
9004935	1 pc

HIF

Loctite 406 Instant adhesive

An instant adhesive designed especially for the fast bonding of plastics and elastomeric materials where very fast fixturing is required. This product offers exceptionally low viscosity.

Part no.	Unit
8005067	1 unit

Take care of your hearing aids

Take good care of your hearing aid. Your Hearing instrument is a high tech device needing regular care in order to provide you the best performance every day.

Sanohra Earplugs Fly

Sanohra Fly ear plugs. Reduces ear pressure experiences when flying.

Part no.	Description	Unit
8519351	EarPlugs Fly Kids, EN	1 set
8519352	EarPlugs Fly Adult, EN	1 set

Sanohra Earplugs Swim

Sanohra Swim earplugs. Enables people to swim without getting water in the ear, reducing ear infections.

Part no.	Description	Unit
8519353	EarPlugs Swim Kids, EN	1 set
8520143	EarPlugs Swim Adult, EN	1 set

SANOHR A fly ear plugs

Beyond "noise protection" it can be important to protect the ear drum (tympanic membrane) from changes in external pressure that are too rapid, e.g., during take off and landing phases in airplanes. For airplane passengers experiencing a problem with the pressure equalisation, the use of a special ear protection product means freedom from an unpleasant feeling or piercing pain during flight.

SANOHR A swim ear plugs

In case of injury to the ear drum or insertion of a vent tube, it is necessary to prevent water from reaching the ear drum through the outer auditory canal. Swimming, bathing or showering might cause inflammation of the middle ear. Staying in chlorinated water for an extended period of time can cause the skin in the outer auditory canal to swell and cause inflammation (otitis externa).

Bite Blocks

Made from styrofoam these disposable bite blocks are used to hold the patient's mouth open in a comfortable position when taking open jaw ear impressions

Part no.	Unit
8519356	Bag/100 pcs

A-Zoft Ear Impression Material

B & C components for ear impressions

Part no.	Unit
87825015105	40 foil bags
87825015004	2x 800g jars

Drevo 4545 Otoform AK Impression Material Kit

8 x S 50 double cartridges of 2 x 25ml A+B

Part no.	Unit
9004439	2x25ml

Otoform A/k 2 part silicone

Proven kneadable impression material, non-sticky and smooth with a slightly pressure-forming consistency. An even and controlled pressure is applied onto the ear tissue. Otoform AK is advantageous for little resilient ear tissues for fitting and sealing of earmolds

Part no.	Unit
9004438	2 pcs

Mixing Pads

Disposable paper pads for mixing impression material. Foam, no slip surface on bottom of pad. Package of two pads with 35 sheets per pad. Dimensions 6" x 6"

Part no.	Unit
8522106	100 sheets

Detax Pink Putty Impression Kit

This impression putty has a soft creamy consistency for easy mixing and removal. The Kit includes two dosing spoons and 500ml of catalyst and 500ml of base material to produce approximately 60 impressions.

Part no.	Unit
A16738	set

Mixing tray

Comes with dosing scale

8515600	Stethoclip, black	1 unit

60 pcs

Large soft electrode size!

ABR

Sanibel™ snap electrodes

Pre-gelled with a very gentle hydrogel, perfect for ABR testing on infants. Size 2.2 x 3 cm. Item no. 8107137 is packed in 20 smaller pouches of 3 electrodes.

Part no.	Unit
8107137	Box/60 pcs (20x3 pcs)

60 pcs

Large soft electrode size!

ABR

Sanibel™ tab electrodes

Pre-gelled cloth electrode with a very gentle hydrogel, perfect for ABR testing on infants. Size 2.2 x 3 cm. Packed in 20 smaller pouches of 3 electrodes.

Part no.	Unit
8107410	Box/60 pcs (20x3 pcs)

60 pcs

ABR

Sanibel™ wetgel snap electrodes

Pre-gelled round foam ECG electrode with button connector. Packaged in convenient 12x5 pcs re-sealable pouches.

Part no.	Unit
8108563	Bag/60 pcs (12x5 pcs)

100 pcs

ABR

Sanibel™ vinyl tab electrode

For alligator clip cable. Solid gel. Size 2.5 x 2.2 cm. Packaged in convenient re-sealable pouches.

Part no.	Unit
8107426	Bag/100 pcs (10x10 pcs)

ABR

Sanibel™ TM electrode

For ECoG. Use with cable 8500650.

Part no.	Unit
8011489	Box/10 pcs
8049550	1 pc

300 pcs

Small size and soft electrode!

ABR

Sanibel™ prewired electrodes

Prewired electrodes with a small footprint. Very good for testing infants. Solid gel. Size 2.2 x 2.2 cm. 100 pouches of 3 pcs.

Part no.	Unit
8107425	Box/300 pcs

20 pcs

ABR

E-A-RLINK™ gold foil tip trodes

For ECoG. Use with cable 8011343.

NEW

50 pcs

ABR

Vermed Economy line 3-pak Solid gel snap Electrode

Solid Gel type snap electrode suitable for newborn screening and Diagnostic follow-up. Latex free. Intended use areas: Newborn, Diagnostic follow-up all ages.

Part no.	Unit
8516252	Bag/50 pcs

ABR

Ambu® Ground electrode 71410-M/1

Part no.	Unit
8500690	1 pc

NEW

60 pcs

ABR

Vermed Wetgel Snap Electrode

Pre-gelled hydrogel electrode with Ag/AgCl sensor. Very suitable for newborn screening or diagnostic follow up. Packaged 3x20 pcs. per pouch.

Intended use areas: Newborn, Diagnostic follow-up, ABR, C-Vemp.

Part no.	Unit
8516221	Bag/60 pcs (3x20 pcs)

NEW

1000 pcs

ABR

Vermed Tab Electrode

Rectangular tab electrode for newborn screening. 12,7x22,9 mm. Conductive Adhesive Hydrogel. 10x10 pcs. per pouch. Intended use areas: Newborn, O-Vemp.

Part no.	Unit
8516225	Bag/1000 pcs (100 pcs per bag)

NEW

60 pcs

ABR

Vermed Hydrogel Snap Electrode

Large soft electrode size making it very suitable for newborn screening and ABR measurements. Cloth material makes it convenient to wear. Size: 22.2.

Intended use areas: Newborn, ABR.

Part no.	Unit
8516907	Bag/60 pcs (3x20 pcs)

NEW

60 pcs

ABR

Vermed Hydrogel Snap Electrode

Smaller than the rectangular version, but otherwise similar. Good soft electrode size making it very suitable for newborn screening and ABR measurements. Cloth material makes it convenient to wear. Intended use areas: Newborn, ABR.

Part no.	Unit
8102022	Bag/60 pcs (3x20 pcs)

NEW

1000 pcs

ABR

Vermed Tab Electrode

Rectangular tab electrode for newborn screening. 22,9x34 mm. Conductive Adhesive Hydrogel. 10x10 pcs. per pouch. Intended use areas: Newborn, O-Vemp.

Part no.	Unit
8516227	Box/1000 pcs (20x50 pcs)
8516227	bag/100 pcs

ABR

Vermed Wet Gel foam

Electrode with an Ag/AgCl sensor.

10x6 pcs per pouch. Diameter 38.1 mm

Part no.	Unit
8108563	Bag/60 pcs

NEW

300 pcs

ABR

Vermed Prewired neonatal eeg

electrode for use in pediatric and neonatal settings. 3 electrodes per pouch. square shape 22.2x22.2 mm

Part no.	Unit
8107425	Bag/300 pcs (3x100 set)

NEW

1000 pcs

ABR

Vermed Economy line Snap Wet Gel Electrode

Non-woven cloth electrode with conductive wet gel. Passed ISO 10993 and is Latex free. Intended use areas: Newborn, Diagnostic follow-up all ages.

Part no.	Unit
8516251	Box/1000 pcs (20x50 pcs)
8516251	Bag/50 pcs

NEW

60 pcs

ABR

Vermed Allround ECG electrode

Provides very good impedance and it well suited for both newborns and adults. Can be used both as snap and tab electrode with alligator cables. Pouches come in 3 pcs, value packs available in 600 pcs. per order. Please contact for order.

Part no.	Unit
8516906	Bag/60 pcs (5x12 pcs)

Disposable electrodes

NEW

ABR

Ambu® 0415M tab electrode

Medium size tab electrode with solid gel for 12-lead ECG. Presented conveniently with 10 pieces to a card. Fish tail tab design reduces electrode lift-offs. Suitable for both adults and children. Intended use areas: ABR Diagnostics of all kinds with Tab electrodes.

Part no.	Unit
8516138	Bag/100 pcs (10x10 pcs)

100 pcs

NEW

ABR

Ambu® 2300 Blue Sensor Tab electrode

The medium size Ambu BlueSensor 2300 electrode features a skin-friendly solid gel that provides optimal signal quality recordings during 12-lead diagnostic resting ECG application. Very suitable for ABR diagnostics of all kinds. Intended use areas: ABR Diagnostics of all kinds.

Part no.	Unit
8516139	Box/1000 pcs (10x100 pcs)

1000 pcs

25 pcs

ABR

Ambu® Neuroline 720

Ambu Neuroline 720 electrodes are pre-gelled and self adhesive. They are ideal for use in sleep registration where the strong, yet skin-friendly, adhesion ensures that the electrode stays in place for the entire examination, even if the patient sweats. Intended use areas: ABR Diagnostics of all kinds.

Part no.	Unit
8500060	Bag/25 pcs

25 pcs

ABR

Ambu® Blue Sensor™ N-00-S

Foam ECG electrode for use with button cables. Wetgel.

Part no.	Unit
8013029	Bag/25 pcs

25 pcs

ABR

Ambu® Blue Sensor™ N-10-A

Foam ECG electrode with 10 cm wire and 4 mm connector, for use with universal electrode cable. Wetgel.

Part no.	Unit
8500670	Bag/25 pcs

ABR

Ambu® Blue Sensor™ P-00-S

High quality Ag/AgCl sensor – ensures excellent trace quality.

Part no.	Unit
8504783	Bag/50 pcs

50 pcs

ABR

Ambu® Neuroline 720 – with 100 cm cable and k-connector

Ambu Neuroline 720 electrodes are pre-gelled and self adhesive. They are ideal for use in sleep registration where the strong, yet skin-friendly, adhesion ensures that the electrode stays in place for the entire examination, even if the patient sweats. Intended use areas: ABR Diagnostics of all kinds.

Part no.	Unit
8503244	Bag/10 pcs

ABR

Ambu® Neurology Needle Electrode

This needle electrode features exceedingly low penetration-resistance levels. The needles have been coated with smooth coating which reduces friction when inserting and working in the target area.

Part no.	Unit
8519037	Box/40 pcs

Surface electrodes tailored to your need

At Diatec we believe that it is important to choose the right surface electrode for each specific recording and patient type.

Wetgel or hydrogel electrodes?

A wetgel electrode consists of water, thickener, ionic salts, surfactants and bactericides or fungicides. Wetgel migrates easily and rapidly onto the skin surface, reducing impedance levels, which in turn will generally result in lower noise in the recording.

A hydrogel surface electrode is less adhesive when compared to wetgel, making it particularly suitable for newborns.

Chloride salt concentration

The higher the chloride salt content, the more conductive the electrode. Higher salt content (10% and above), pre-gelled surface electrodes are useful for making fast, high quality measurements of biopotentials. High conductivity electrodes generally have reduced artifact, due to the lower impedance generated between electrode and skin surface. As the chloride salt content drops, there is a corresponding reduction in electrode conductivity.

If the chloride content is below 10%, the electrode can then be employed for longer recording times, with a reduced risk of skin irritation. As a rule of thumb, wetgel has a chloride content of 10% and hydrogel 4%.

It is important to use electrodes with similar chloride salt content when testing.

The impedance of the electrode/skin junction is highly dependent on the electrolyte type and the chloride salt concentration. For example, a hydrogel electrode with 4% chloride concentration will have approximately 10x higher impedance than a wet liquid gel electrode with 10% chloride concentration, after first application to the skin.

Adhesion

An advantage of a conductive adhesive is that the active surface can be as large as the electrode itself because no additional adhesive strip is needed. The Sanibel disposable electrodes come with a range of adhesive qualities. All electrodes are designed to adhere well to skin surfaces, but the adhesion characteristics can be grouped according to the application:

- Strong adhesive
- Moderate adhesive

Strong adhesion is not recommended for newborns.

Skin preparation

For optimum electrode to skin conductivity, the skin should be lightly brushed with a gentle abrasive gel/wipe.

An alcohol wipe is not recommended to improve conductivity as this will only dry out the skin surface.

Disposable electrodes

Item no.	Surface electrode	Adhesion electrode backing / Dimension (part on skin) / Material hardness / Electrode cable	Chloride conc. - Gel type	Category / Patient age	Special conditions
8107410	 Sanibel™ tab electrodes Packed in 20 smaller pouches of 3 electrodes (total of 60 electrodes).	Moderate / 3 x 2.2 cm / Soft tissue / Tab cables (ETSE tab surface cable kit #8011352)	Solid gel/ Hydrogel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Low chloride content, less adhesive. Especially suitable for newborns.
8107137	 Sanibel™ snap electrodes Pouch of 3 electrodes bundled in a box with a total of 60 electrodes.	Moderate / 3 x 2.1 cm / Soft tissue / Snap cable (ETB surface electrode kit #8011346)	Solid gel/ Hydrogel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Low chloride content, less adhesive. Especially suitable for newborns.
8107425	 Sanibel™ prewired electrodes 3 electrodes in each pouch with a total of 300 electrodes.	Moderate / 2 x 2 cm / Soft tissue / Prewired	Solid gel/ Hydrogel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Low chloride content, less adhesive. Especially suitable for newborns. Electrode cables are disposable, reducing cross contamination. Small soft electrode.
8108563	 Sanibel™ wetgel snap electrodes 12x5 pcs re-sealable pouches (total of 60 electrodes).	Strong / Ø 1 inch, 2.55 cm / Soft plastic / Snap cable (ETB surface electrode kit #8011346)	3% - Wetgel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Strong adhesion. Low chloride content (not recommended for newborns under 1 month of age).
8109096	 Sanibel™ snap electrodes 60 electrodes in one resealable pouch. Repacked in 10 smaller bags of 6 pcs.	Moderate / 3.5 x 2.3 cm / Soft tissue / Snap cable (ETB surface electrode kit #8011346)	Solid gel/ Hydrogel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Low chloride content, less adhesive. Especially suitable for newborns. Large soft electrode.
8107426	 Sanibel™ vinyl tab electrodes 100 electrodes in one resealable pouch.	Moderate / 2.5 x 2.2 cm / Hard plastic / Tab cables (ETSE tab surface cable kit # 8011352)	Solid gel/ Hydrogel		Low cost tab electrode.
8500060	 Ambu® Neuroline™ 720 side snap 25 electrodes in one pouch.	Strong / 2.8 x 2 cm / Soft plastic / Snap cable (ETB surface electrode kit #8011346)	Wetgel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Strong adhesion. High chloride content (not recommended for newborns under 1 month of age).
8013029	 Ambu® Blue Sensor N-00-S Bag of 25 electrodes	Superior / 3 x 2 cm / Soft plastic / Button cable	Wetgel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Especially suitable for newborns.
8500670	 Ambu® Blue Sensor N-10-A Bag of 25 electrodes	Superior / 3 x 2 cm / foam backing	Wetgel	Specifically Developed for children	Superior adhesion to ensure optimal signal during short to medium term applications
8504783	 Ambu® Blue Sensor P-00-S Bag of 50 electrodes	Superior / 3.4 cm / Hard plastic / various	Wet gel	ABR, MLR, LLR, VEMP / Electrode is suitable for all ages.	Ideal for paediatric patients

ABR

Sanibel™ ECoChG starter kit

For Eclipse™ and Bio-logic® AEP system. Includes cable, gel and 2 pcs TM electrodes.

Part no.	Unit
8013209	Set/4 pcs

ABR

Sanibel™ ECoChG cable

For Eclipse™ and Bio-logic® AEP system. 1.5 mm/.060" female connector. For use with Sanibel™ TM electrodes.

Part no.	Unit
8500650	1 pc

After use ...

After use, cables should be wiped with a soft cloth that has been dipped in a mild detergent solution or alcohol.

Contact between the cleaning solution and the connectors should be avoided.

ABR

Disc electrodes

For use with Ten20™ electrode paste. Available in Red (R), White (W), Blue (B), Yellow (Y), Black (K). 50 cm cable.

ABR

NuPrep™ skin prep gel, 114 g

Efficient, yet gentle skin abrasive. Chloride and acetone free.

Part no.	Unit
8500320	Box/3 tubes

ABR

Lectron® II electrode gel, 250 ml

Highly conductive, chloride-free electrode gel. Recommended for use with Sanibel™ TM electrodes for ECoGch.

Part no.	Unit
8102626	Tube/250 ml

ABR

Sonavelle® electrode gel, 250 ml

Formaldehyde-free and glycerol-free.

Part no.	Unit
8500380	Bottle/250 ml

ABR

Spectra 360® electrode gel, 250 g

Salt- & chloride-free conductive electrode gel suitable for long-term applications.

Part no.	Unit
8500740	Tube/250 g

ABR

Everi™ abrasive paste, 160 g

Reduces the skin impedance during EEG, EP, ECG and Holter Stress test examination.

Part no.	Unit
8012952	Bottle/160 g

ABR

Ten20™ conductive EEG paste, 114 g/228 g

Adhesive gel for disc electrodes. Available in pack of 3x4 oz/114 g tubes, 3x8 oz/228 g jar.

Part no.	Unit
8012924	Box/3 tubes
8500330	Box/3 jars

ABR

SignaGel®, 250 g

Hypoallergenic, bacteriostatic conductive saline electrode gel.

Part no.	Unit
8102628	Tube/250 g

ABR

3M™ Red Dot™ trace prep, 5 m

One-step skin preparation. 18 mm x 5 m / 0.70" x 196".

Part no.	Unit
8500030	Dispenser/5 m

12 rolls

3M™ Transpore™ Surgical tape, 9.14 m

Transparent, latex-free, water-resistant and porous for breathability.
25 mm x 9.14 m / 1" x 10 LY.

Part no.	Unit
8500750	Box/12 rolls

12 rolls

3M™ Micropore™ Surgical tape, 9.14 m

Latex-free and hypoallergenic. Holds well on damp skin.
25 mm x 9.14 m / 1" x 10 LY.

Part no.	Unit

PDI Detergent wipes, refill

Solo lid bag. Wipe size: 300 x 245mm.

Part no.	Unit
8000210	Bag/225 pcs

Infection control

A clean clinic is also part of your professional image

Infection control is so much more than cleaning probe tips, protecting your personal computer's keyboard, and maintaining high standards within hygiene using e.g. disinfectant detergent for a quick and extensive disinfection of non-invasive medical devices.

When it comes to infection control, preventing germs, dirt and dust from spreading via other sources, is also of critical importance – both to the safety of your patients and yourself! Gloves, shoe covers, facemasks, and aprons are just some of the “accessories”, which can help you succeed in this.

Maintain high, professional standards and make your clinic an ever-safe environment for your patients, making the wearing of gloves, facemasks and other body protection wear a natural part of the “patient interaction” process.

Bouffant Caps

Perform high Hygiene practices in front of your patients or clients.

Part no.	Unit
8519350	Bag/250 pcs (21 Inches)
