PEOPLE FIRST

Epoq Power

– performance you can rely on

You need more than just power to get the best out of your hearing. Your hearing solution should also provide a clear, closer-to-natural sound picture, as well as empower you in all of your everyday activities. Whether you're with friends, family or co-workers, you want to be able to listen and share experiences.

And when watching TV or talking on the phone, you want to enjoy crystal clear sound without distortion or delay. If there's one device that can adapt to your needs, it's the new Epoq Power.

This small, award winning solution was until recently only available for milder hearing losses. But now you too can enjoy the clear, rich and comfortable sound quality that defines Epoq as a family.

NOTHING SOUNDS MORE NATURAL

While standard instruments operate independently, a pair of Epoqs continuously communicates wirelessly with each other to provide a clear and balanced sound picture. With Epoq Power, you'll find it easier to decide WHERE sounds are coming from, WHO is speaking and WHAT is being said.

NOTHING LOOKS MORE ELEGANT

Epoq Power's slim and elegant shell looks nothing like the big and bulky power solutions of yesterday. The new technology has made it possible to reduce the size considerably and at the same time significantly improve sound quality.

NOTHING MAKES YOU FEEL MORE CONNECTED

Most people can use a phone without a moment's hesitation. Now you can do the same. Say farewell to poor sound quality and hello to Oticon Streamer! Epoq's optional wireless companion device can send the sound from your phone or TV directly into both ears thus turning your Epoqs into tiny headsets. Streamer even works as a remote control for your Epoq instruments, so you can change the volume or programs at the mere touch of a button.

MUCH BETTER HEARING, FAR LESS EFFORT

With Epoq you can always be part of the moment.

- Enjoy CLEARER, MORE NATURAL sound quality
- Get better at LOCATING SOUNDS – wherever they are
- TALK ON THE PHONE and LISTEN TO THE TV with the same ease as everyone else
- Enjoy a new in ear system design that helps ELIMINATE the “PLUGGED UP” FEELING
- Enjoy GREAT COMFORT and no fear of feedback and whistling
- Wear devices that are so SMALL and DISCREET, you’re likely to forget they’re even there

Don't just take our word for it. Experience for yourself what life could be like with the new Epoq Power!

What Epoq Power users are saying:

A new world of sound

“I can’t believe how good the Oticon Epoqs are. I’m hearing the nearest thing to real sound for the first time in 20 years! I can even now hear things like the flag flapping in the wind in my backyard and the noise of the rope against the flagpole.” *Russell, 70*

“Being able to get the signal from my mobile phone sent directly into both ears is a tremendous relief. It’s indescribable! I can even talk while I’m driving, without breaking the law! The interaction with the Streamer is superb.” *Bjarne, 65*

“I listened only to old music that I knew the lyrics to, because I could no longer pick out words from sound. Now, I hear the words to my music.” *Connie, 33*

Oticon Epoq was recently awarded three prestigious international awards for its innovation, world-class engineering, and pioneering design.

Accessories

ConnectLine

The unmatched way to give even more satisfaction with your instruments.

With the optional Oticon Streamer, you'll be able to enjoy the benefits of using landline phones and cell phones, made possible with our new hearing instruments. Listening to music or watching TV becomes a pleasure also for other family members.

FM-Connections

The R12 FM-receiver the smallest FM solution you can get, now available in multiple colours.

While hearing instruments make everyday sounds more accessible, FM solutions focus on speech and make listening over distances or in particularly noisy situations – like classrooms – a lot easier.

People First

We believe that it takes more than technology and audiology to create the best hearing instruments. That's why we put the individual needs and wishes of people with hearing loss first in our development of new hearing care solutions.
