life-changing technology

Life-changing technology designed for celebration

Enjoy the Oticon sound experience

It's time to start socialising and celebrating a life filled with sound.

Thanks to groundbreaking technology, Oticon Zircon offers 360° speech and clear sound from all directions, even when in noisy environments, so you can focus on the sounds you love.

Connect with more

Oticon Zircon offers an extensive connectivity package so you're always connected to what matters. Direct streaming from compatible iPhone® and Android™ devices* make calls with loved ones easy, and sound streaming from TVs, computers and tablets help you access the sounds of life all around you.**

Find a hearing aid that suits you

With Oticon Zircon, slight to profound hearing loss is covered across a comprehensive range of styles. Select from five attractive colours and a choice of rechargeable or non-rechargeable batteries.

“ DID YOU KNOW?

Oticon SmartCharger^ gives you the freedom to travel light by keeping your hearing aids powered up, dry, and protected.

It's easy to use and powerful: just 30 minutes of charge will give you six hours of power.*

* Android devices need to support Audio Streaming for Hearing Aids (ASHA) to allow direct streaming to Oticon Zircon.

Please visit [oticon.co.nz/compatibility](https://www.oticon.co.nz/compatibility) for more information.

** Additional accessories may be required and are available for purchase separately.

* 30 minutes gives an additional five hours for miniBTE R.

^ SmartCharger for miniBTE R is unavailable at the time of launch. Contact your local hearing clinic for availability.

The open sound experience to celebrate life all around you

life-changing
technology

“ DID YOU KNOW?

Sound and speech from all sources are crucial to the brain's natural way of working. That's why Oticon Zircon offers an open sound experience, so you can enjoy excellent sound quality and support your brain's health.

With traditional hearing aids you can miss important sounds, like someone talking next to you or a child calling you from behind. This is because these hearing aids are designed to only focus on the sound in front of you, and block out everything else. Building on Oticon's BrainHearing™ philosophy, Oticon Zircon balances sound from all directions and keeps speech clear, letting you comfortably locate and focus on what you want to hear. This is the open sound experience.

Why do you need to hear multiple sounds?

Living with a hearing loss can be frustrating. Not hearing someone next to you, not being able to follow a conversation nearby - it can be isolating and make you withdraw from these situations.

Your brain needs access to all sounds in order to perform optimally. The open sound experience helps your hearing and your brain to stay healthy by providing multiple sound sources from all directions.

Help your brain with BrainHearing technology

Improving your hearing has many positive effects. Treating hearing loss is proven to improve people's quality of life in many ways, including easier listening, improved understanding, and even better mental health.*
